Lighting was integrated within the architecture to achieve spatial clarity and to create a comfortably luminous surround with intermittent sparkle.

Ambient light emanates from fluorescent coves and from the ceiling and pedestrian bridges which incorporate backlit translucent fabric panels.

Architect-designed crystal sculptures glisten from fiber optic points above.

The juxtaposition of polished and matte finishes is enhanced by direct lighting. In combination, a more relaxed and defined space was created.

Lighting Designer: Cooley Monato Studio – Renée Cooley and Jenny Ivansson

Architects: DLR|KKE – Natina James and Gabellini Sheppard Associates, LLP – Michael Gabellini, FAIA, Kimberly Sheppard, AIA, and Dan Garbowit, AIA

Project Owner: Mall of America

Photography: Paul Warchol Photography – Paul Warchol
