MALL OF AMERICA – EAST BOULEVARD RENOVATION, BLOOMINGTON, MINNESOTA. LIGHTING DESIGN BY COOLEY MONATO STUDIO

Posted on Friday, January 10, 2014 · [Leave a Comment](#)

The redesigned East Boulevard at Mall of America is now characterized by spatial clarity and a strong sense of place that unifies the various retail brand identities. New lighting and finishes make for a dramatic intervention on a limited budget.

Central to the Boulevard is a 72 foot diameter Rotunda that is an active event venue. The upper dome ceiling was transformed with a sculpture of concentric fabric circles that are washed and defined by halos of light. The goal of creating an 'out of this world' feature for the Rotunda ceiling was achieved through the collaboration of the project's many participants.

The sculpture's subtle interplay between surface and light combined with the massive scale creates a powerful presence in the space.
