Call for Historic Items

The Society has established a task force to identify, collect, preserve and present items relevant to the history of the IES. One of the group's first endeavors is a call for contributions from the membership. If you have anything regarding the history of the IES that the task force should know about, please contact the chair, **Jody Good**, at jmgood3@good-lighting.com, with a description of the item. For now, the group is concentrating on IES items, events and historic memorabilia on the Society level. The task force is particularly interested in any oral or recorded history items that may exist. Eventually, the group intends for many of these items to be available online.

IESNYC Awards 2017 Thesis Prizes

The IESNYC Thesis Prize is an annual \$1,000 award given to two graduating students whose thesis projects demonstrate excellence in design and/or research and best represent the intellectual insight, rigor and quality standards as set forth by the respective school department and the student's thesis committee. The 2017 recipients are:

Valerie Chengyi Qin (Parsons), whose thesis focuses on lighting that is common in the pre-operative holding area in healthcare environments, where patients often experience anxiety before surgery; and **Valeria Terentyeva** (LRC), whose thesis is titled, "Analyzing theoretical models for predicting thermal conductivity of composite materials for LED heat sink applications."

OBITUARY

William Warfel, IALD Founding Member

William "Bill" Warfel, a founding member of the IALD, passed away on May 28 at the age of 84. Mr. Warfel earned his undergraduate degree in theater from Yale University and his

MFA in stage lighting design from Yale School of Drama. He began his career teaching in the theater department at Dartmouth College, before working as a technical adviser for Century Lighting in New York City, during which time he contributed to several projects for the New York World's Fair, including the special-effects lighting for the iconic Unisphere.

Mr. Warfel then returned to teaching, first in LIU's theater department and then at Yale School of Drama, where he went on to become chairman of the design department. Over the course of his career, Mr. Warfel wrote two textbooks on theater lighting,

which are still widely used today, and was a speaker and panelist at several theatrical conventions. Mr. Warfel also co-established an independent design company, which later became Systems Design Associates. Upon retiring from Yale in 1993, he devoted much of his time to the company and lighting design work for museums, performing arts spaces and churches, for which he received numerous awards.

In lieu of flowers, Mr. Warfel's family asks that donations be directed to: 1) Christ Church New Haven, 84 Broadway, New Haven, CT, 06511, or online at www.christchurchnh.org/giving (type Bill Warfel in the notes), or 2) International Festival of Arts and Ideas by calling/emailing Patrick J. Dunn at 203-498-3704 or JDunn@artidea.org or online at www.artidea.org/donate (type Bill Warfel in the notes).
